

## Internet Explorer 8 and Lawson Software

Released from Lawson Software on April 16, 2009:

While Lawson intends to support our products on Microsoft Internet Explorer (IE) 8 we do not currently support this version of the browser. When accessibility via Microsoft Internet Explorer 8 becomes available, specific version requirements and other information will be made available to customers. In the meantime please note the following:

Internet Explorer 8 will not be automatically installed. However, starting next week, Internet Explorer 6 and Internet Explorer 7 users on Windows XP, Vista and Server 2003 will receive an Internet Explorer 8 update notification. Users will have to opt in for installation, or may request a reminder for later. IT Administrators/Businesses can block the download.

More more information on how to block the IE8 Automatic Update option: <http://www.microsoft.com/downloads/details.aspx?FamilyID=21687628-5806-4ba6-9e4e-8e224ec6dd8c&displaylang=en>
